<p><b>Ex. 10</b></p>	<p><b>U-37143</b> - Entergy Louisiana, LLC, ex parte. In re: Request for exemption under the Commission's General Order dated October 10, 2013 (the Transmission Siting Order) regarding the West Bank 230kV Transmission Project.</p> <p><b>In re: Discussion and possible vote on Uncontested Stipulated Settlement.</b></p> <p>Vice Chairman Skrmetta made the following motion: I move to approve the uncontested stipulated settlement which will approve a portfolio of projects referred to as the Westbank 230 KV Project. But, I want to provide some context to the public for why the Commission approves projects like these.</p> <p>Two days ago, President Trump and Governor Landry, joined by other Louisiana leaders and Hyundai Motor Group, announced from the Oval Office that Hyundai Motor Group has made a groundbreaking decision to invest \$5.8 billion in a new manufacturing facility in Louisiana. This first-of-its-kind site marks Hyundai’s inaugural North American steel facility,</p>

	<p>establishing a fully integrated, made-in-America supply chain to support its automotive manufacturing operations across the United States.</p> <p>The ultra-low carbon steel production plant will be located on approximately 1,700 acres in Donaldsonville, Louisiana, anchoring the RiverPlex MegaPark on the Westbank of the Mississippi River in Ascension Parish. At approximately 17,000 acres, RiverPlex is the largest undeveloped tract along the deep-water segment of the Mississippi River. Hyundai Steel Company (HSC), a member of Hyundai Motor Group, is expected to create more than 1,300 direct new jobs with an average salary of \$95,000. Louisiana Economic Development estimates the project will result in about 4,100 indirect new jobs, for a total of 5,400 potential new jobs in the Capital Region.</p> <p>With this announcement and the previously announced Meta investment, Louisiana is Winning and winning big. I want to thank Governor Landry for his leadership in positioning Louisiana for this moment. I also want to commend the LPSC and my fellow commissioners for our part in preparing Louisiana for this moment. Projects like Hyundai Steel would not be possible without the LPSC’s oversight and approval of infrastructure projects like the Westbank 230kv Project. Not only does Louisiana need transmission investment to attract projects like these, but we also need an adequate supply of reliable and affordable generation. Through the Integrated Resource Planning process and our certification proceedings over the last decade, Louisiana is able to offer reliable and affordable power that is attractive to companies like Hyundai and others. In fact, the most recent Energy Information Administration report, December 2024 data, indicated that Louisiana had the lowest industrial rates in the nation. I want to underscore it: this enormous Hyundai investment in our state is a direct result of both our proactive approach to investment in our electric grid and also the competitiveness of our industrial rates. I am ready to roll up my sleeves and keep advancing the infrastructure needed to support Louisiana’s economic development opportunity while ensuring cost-based, affordable rates for all residential, commercial and industrial customers.</p> <p>After discussion, on motion of Vice Chairman Skrmetta, seconded by Chairman Francis, and unanimously adopted, the Commission voted to accept the Uncontested Stipulated Settlement filed into the record on February 11, 2025.</p> <p>Present for Questions/Comments:  Larry Hand – Vice President for Regulatory &amp; Public Affairs for Entergy Louisiana  Phillip May – CEO of Entergy Louisiana  Randy Young – Louisiana Energy Users Group</p>
